

OUR HEALTH IS YOUR HEALTH.

GLH recently received an "A" grade, the top rating on a national survey of health care safety from the Leapfrog Group.

We are accepting all types of insurance.

Having Greenwood Leflore Hospital as an integral part of our community is something that's easy to take for granted. It's been here for 116 years, and until recently it's been assumed that it would be here forever.

The truth is, GLH can only be as healthy as the number of residents we serve who are able to pay for services. And although there is a glimmer of hope that we can remain open longer than expected while a permanent solution is determined, much of that depends on you. And ***your health*** depends on having vital services close by, including an emergency department as well as the following services that are still open.

These departments are staffed with highly qualified and dedicated employees who are here to take care of you and your family. If you need any of the following specialties or diagnostic testing, please consider what this means for the future of GLH, and talk to your provider about keeping your healthcare services local.

- + Cardiology
- + Emergency
- + Family Medicine

- + Gastroenterology/Endoscopy
- + Laboratory Testing
- + Neurology
- + Outpatient Cardiopulmonary Diagnostic Testing (EKG, Pulmonary Function Test, Echocardiogram, EEG, Stress Test, Holter Monitor)
- + Outpatient Infusion Services
- + Outpatient Radiology Diagnostic Testing (Mammogram, Bone Density Scan, MRI, CT, PET Scan, Ultrasound, Nuclear Medicine, X-ray)
- + Outpatient Surgery (General, Vascular, Orthopedic)
- + Podiatry
- + Radiation Oncology
- + Rehabilitation (Physical, Occupational, Speech, Cardiac)
- + Retail Pharmacy
- + Wellness Center
- + Wound Care

There's never been a more important time to take care of your health while improving that of GLH—now and into the future.

Greenwood Leflore Hospital
The right care at the right time
